

# GETTING STARTED WITH SOFTWARE FOR DETECTING PLAGIARISM AND AI

 **Compilatio**  
magister

 **Compilatio**  
magister+

Teachers, **promote academic integrity** and **save time** by detecting suspicious texts.

---

You want to **promote authenticity**  
in your students' assignments?

**Compilatio Magister or Magister+**  
combine **equity** and **pedagogy**  
to prevent academic fraud.

# Using Compilatio Magister and Magister+ in 6 steps

---

**Folder configuration** and choice of whether or not to index to the reference library.

**Document collection** or deposit in the interface.

**Start assignments analysis.**

**Obtaining the rate of suspicious texts,** examining the various forms of plagiarism.

**Manual verification and refinement** of results.

**Interpretation of score** and decision-making by user or institution.

# 2 Compilatio services for teachers

Service Details	Compilatio magister	Compilatio magister+
Text similarity detector	✓	✓
Resources to help prevent plagiarism	✓	✓
Technical support by ticket 24/7	✓	✓
<b>AI-generated text detector</b>		✓

# Login to Compilatio Magister and Magister+ services

---

## 1st login

- Service requiring **no installation**.
- On the website [www.compilatio.net](http://www.compilatio.net), click on the login button at the top right.
- Username and password sent by your Compilatio referent.

Or

- Login with your institution's credentials (if SSO login is enabled).

To find out who the Compilatio referent at your institution is, please contact us: [support@compilatio.net](mailto:support@compilatio.net).

## Visualizing features

**Search for a document** in your account or in your establishment's reference library: author name, title, description, etc.

**Toolbox:** Educational resources about AI and plagiarism to share with your students.

**Notifications:** Information on certain events, updates, usage tips for the software, etc.

**Help center:** quick access to the complete FAQ, direct contact with the support team.

**Settings:** modification of personal data, history of actions performed, change of password, etc.

# Uploading your documents for analysis

Create a folder and define the method for submitting assignments. Students do not have access to your personal account or analysis results.

The screenshot displays the 'Compilatio magister' interface. On the left, a sidebar contains navigation options: '+ New folder', 'Default folder', 'Folder name 1', 'Folder name 2', 'Document database', and 'Recycle bin'. The main area shows a folder named 'Folder name 1' with two buttons: '+ Add files' and 'Collect and share'. Below these is a table of documents with checkboxes, document names, progress bars, and 'Analyse' or 'Report' buttons. A callout box points to the '+ Add files' button, and another points to the 'Collect and share' button. A third callout box points to the 'Document database' option in the sidebar.

**Manually adding assignments saved to your computer.**

**Submission of work by your students via a URL to be distributed to them.**

**Ability to add documents to the reference library**

Document name	Progress	Action
Document name 1 Further information	43%	Analyse
Document name 2 Further information	22%	Report
Document name 3 Further information	8%	Report
Document name 4 Further information		Report

The reference library is **all the documents indexed by Compilatio Magister and Magister+ users.**

# Analysis of students' work

---

## Analysis reliability including comparisons with:

- hundreds of billions of **web pages**,
- hundreds of millions of content from private and open-access publications, internationally renowned **professional publishers**, **deposits of universities** and **research centers**, influential institutions, **website archives**, student assignments, etc.
- documents added independently by users of Compilatio client institutions.

## Analysis steps

While analysis are being processed, it is **not necessary to remain logged** into your account. In the case of prolonged inactivity, remember **to refresh your web page** in order to update your results.

# Interpreting analysis results

When the analysis is complete, click the “Report” button to access the results. The Compilatio analysis report can be read in 2 steps.

## Discovery of the rate of suspicious texts

- Comparison between the outcome and the **expectations of the grader** and/or institution.
- **Acceptable or unacceptable rate**, defined according to the type of assignment controlled, the subject studied or the level of requirements of the establishment.

Available only with  
Compilatio Magister+

# Refinement of results with points of interest

## Advanced Features

- Identify the nature of the suspicious area.
- Ignore a text box.
- Restore a skipped source at any time.
- Compare face-to-face the texts of the analyzed document and the source of the detected similarities.

Available only with  
Compilatio Magister+

The 'Points of interest' interface is divided into three main sections: 'Summary', 'Points of interest', and 'Sources of similarities'. The 'Points of interest' section displays a document with four distinct areas highlighted in different colors: orange, yellow, blue, and green. Each highlighted area is accompanied by a specific icon: a brain for AI, a quote for text, a warning sign for suspicious areas, and a document for source origins. To the right of the document, a control panel allows users to manage these areas. It features two entries, each with a numbered arrow (2 and 4), a 'Source origin' label, and a dropdown arrow. The first entry (2) is currently expanded, showing a progress bar, the text 'Area 2 : 11%', and an 'Ignore area' button. The second entry (4) is currently collapsed. A purple arrow points from the 'Available only with Compilatio Magister+' box to the 'Points of interest' section. Another purple arrow points from the 'Sources of similarities' section to the 'Side-by-side comparison' section below.

The 'Side-by-side comparison' interface is designed for a direct comparison between a document and its source. It features two columns: 'Document name' and 'Source URL'. Below each column is a progress bar and a scrollable text area. The document name area shows a document icon and a green progress bar. The source URL area shows a document icon and a green progress bar. The text areas contain the content of the document and the source, respectively, with some text highlighted in green to show similarities. A purple arrow points from the 'Sources of similarities' section of the 'Points of interest' interface to this 'Side-by-side comparison' section.

# Analysis of detected sources

## Accurate identification of detected sources

- Sources classified by decreasing similarity rate.
- Description of sources with page name, URL and secondary sources.
- Similarity rate of each source compared to the entire document.
- Possibility of excluding the desired sources, the similarity rate is recalculated.

# Measuring Multilingual Similarities and Reformulations

## Get a more detailed analysis

From the “Source” page, manually add an additional source (an open-access URL or a document from your reference library) and rerun the analysis.

**Detect multilingual similarities** when the added source is in a different language from the document you have already analyzed. This feature of Compilatio Magister+ can be used in many languages:

- **the main European languages:** French, English, German, Spanish, Italian, Portuguese, Dutch, Polish, Catalan, etc.
- **other languages from around the world:** Russian, Arabic, Chinese, Turkish, etc.

**Detect deep reformulations between 2 texts** when the added source is in the same language as the analyzed document.

Available only  
with Compilatio  
Magister+

## Similarities

### ^ Sources added by the user

	Source Title		9%	
	Source Title		2%	

### ∨ Main sources detected

### ∨ Ignored sources

### ∨ Referenced sources

# Editing analysis documents in PDF format

---

These documents allow you to:

- extract and **archive** results,
- **pass on** information to a **certifier** or **disciplinary committee**,
- use the document as a **basis for discussion** with the student about improvement areas.

	Analysis report	Certificate of analysis
Percentage and location of suspicious texts	✓	✓
Score of similarities and unrecognized languages	✓	✓
Score of content potentially written by AI (with Magister+)	✓	✓
Origin of detected sources: content generated by an AI (with Magister+), web sources, etc.	✓	✓
Whole text with location of sources of detected similarities	✓	✗
