

INTALLATION OF COMPILATIO MAGISTER IN MOODLE

Objective: to integrate plagiarism detection into the teaching platform used by teachers.

Do you want to **easily install** an effective anti-plagiarism tool? Integrate the **Compilatio plugin** in Moodle.

Install the Compilatio Magister plugin

Download the plugin

- **Directly from the community website:**
https://moodle.org/plugins/plagiarism_compilatio/versions
- **Compatibility with Moodle versions** (older versions are no longer maintained by our support team).

Enable Compilatio

- **Access:** Site administration > Plugins > Plagiarism > Compilatio plagiarism plugin.
- **Add the API activation key and the web services address** (elements transmitted by Compilatio).
- **Configure the CRON**
 - **Access:** Site administration > Server > Scheduled tasks.
 - **Tip:** CRON every 5 minutes = optimal and more responsive connection between Moodle and Compilatio.

Setting up the Compilatio Magister plugin

"Compilatio plagiarism detection plugin" page

Customise a warning message

- A warning message for students that is displayed every time an assignment is submitted.

Choose the activities where Compilatio will be available

- Assignment, workshop, forums....

Set options

- Student access to analysis reports.
- Teacher access to document author identification (internal to your institution).
- Indication of ownership of submitted work.

Set the plugin options

"Default values for Compilatio" page

All of these options can also **be modified by users** (other than students) in the Compilatio settings of the activity.

- **Allow similarity detection**
 - Yes, to make it easier for teachers to use Compilatio.
 - No, to let them enable it only when they need it.
- **Define the colour code for similarity rates**
 - Visual cue for teachers.
 - In accordance with your institutional policy.
- **Share results with students**
 - Option to display the percentage of similarities.
 - Send an email with the report.
 - Option to access the detailed analysis report.
- **Add work to the document database**
 - Yes, to allow comparison between all the work in your school.
 - No, to analyse without Compilatio reusing the document for future analyses (e.g. for ad-hoc informational analyses).

Manage the integration of the plugin

"Self-diagnosis" page

- Verification that **all options are operational**.
- Information on **how the plugin works**.
- Possible causes of malfunction.

"Statistics" page

As an administrator, you have an overview of Compilatio usage statistics for your entire Moodle platform.

- **Statistics for all activities**, assignments, users etc.
- **Export to CSV** via the dedicated button to keep track of history and progress.

"Help" page

Compilatio is there for you at all times.

- Compilatio **FAQ** and **Help Center**.
- **Direct contact** to our support team.

Consult the compliance register

Data protection

- Access: Site administration > Users > Data protection and policy > Plugin personal data register.
- **Viewing and protecting the data** stored by the plugin.
- Responses to user requests (adding, modifying, deleting their data).

Information

In order for users to be able to send you requests, they must be enabled.

- Access: Site administration > Users > Data protection and policy > Data protection settings.

Integrating your plagiarism prevention into Moodle

Thank you for your trust and enjoy the installation.
