

USING COMPILATIO MAGISTER IN MOODLE

Objectives: to prevent and detect plagiarism with a tool already mastered by teachers.

Want a quick and effective
anti-plagiarism tool to implement in
your learning platform?
Integrate the **Compilatio plugin** into
Moodle.

Enable Compilatio and choose the options

To enable the Compilatio plugin: In an activity > Settings > Compilatio plagiarism detection plugin. 

Run the analyses according to your teaching methods

- **Manually**
 - from an activity for all tasks, click "Analyse all documents" button
 - or for each document individually ("Analyse button).
- **Automatically** at a specific date/time.

Add submissions to the Document Database

- **Compare documents with other** documents from your school also stored in Compilatio.
- Modify documents directly in the activity (homework, workshop...).

Set similarity thresholds

- **Depending on the assignment**, based on training or institutional policy.
- **Save time** in reading results.

Share results with students

- **Visibility of the percentage** of similarities obtained.
- **Access to the full detailed report** (depending on the configuration set by the Moodle administrator).
- Send an **email as soon as the results are available**.

Understand the features

Benefit from tailor-made support

- Quick access to the **comprehensive FAQs**,
- Contact our **support team directly from Moodle**.

View statistics

Key figures about Compilatio analyses in each activity:
number of documents analysed, average similarity rate, etc.

Get notified in real time

- **Receive warning** with important information, errors or unavailability of the service.

Search for a document

- **Origin of a source** from your institution's reference library: name of the author, of the course in your platform, etc.

The benefits of the software

ompilatio magister

Ease of deployment:

- **In the educational platform** already used by your teachers.

Reliability of comparisons at 3 levels:

- web pages, articles and publications freely available on the **Internet**,
- content uploaded to the software by your staff,
- documents from all other Magister users.

Flexible adjustment of results:

- passages to be ignored,
- sources to be excluded.

Feature performance :

- Interfaces and analyses in **several languages**,
- integrated **educational resources**,
- different document formats accepted: .pdf, .txt, .xls...
- percentage of similarity rate,
- location of borrowed material,
- accept submissions of student work **without a "student" user** account required.

[More information](#)

Access to the analysis results

Check that the analyses are carried out correctly:

- Documents under analysis = 🌟
- In case of errors / unavailability of the service, use the "rerun failed analyses" button.

⚠️ Analyses may not start immediately: there is a delay in sending and retrieving information between the Moodle platform and Compilatio (defined by your Moodle administrator).

See result at a glance

- Percentage of similarities in the Compilatio bar **under each document**.

Understand the results

- **See details of the analysis** report accessible by clicking on the Compilatio bar or on the percentage of similarities.
- **Quantity of similarities** found.
- **List of sources** with their location in the text.
- Passages in the document found to be similar.

Refine the results

- **Option to ignore sources**, paragraphs, possible quotations...
- Automatic recalculation of the similarity rate.

Share results

Download in PDF or send by e-mail

- the full analysis report,
- a summary of the results.

Choose Compilatio in Moodle
